How to install watchfaces

You can install custom watchfaces with Hello Haylou app. [Download](#) (Android).

1. Copy bin file to your smartphone;
2. In Hello Haylou app go to More -> Watch face -> Custom files tab;
3. Add watchface from explorer and install it;
4. Enjoy your new watchface!

Additional information

If program looks cropped, you most likely have screen scaling enabled. You need to click on the exe file with the right mouse button, go to the properties, the compatibility tab, click the button "Change the high dpi parameters", in the window that opens, check the box next to "Override the high resolution scaling mode" and select "System".

All images must have .png extension and 16 or 24bpp (color depth, Adobe Photoshop uses 24bpp by default)! All images of one element must have the same size!

Haylou Solar has 240*240px screen.

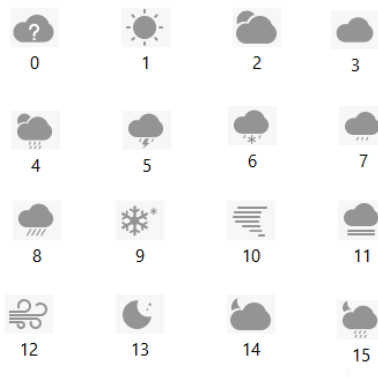

Short info about watchface elements:

- Hours hand : 1 image, 240*240px, X and Y = 0;
- Minutes hand : 1 image, 240*240px, X and Y = 0;
